

COMPANY PROFILE OF MOUNTAIN ENGINEERING

SINCE - 2015

COMPANY OVERVIEW

Mountain Engineering is a Bangladesh-based HVAC engineering and technical services company.

We design, install, test, and maintain heating, ventilation, air-conditioning, and refrigeration systems. From design to long-term maintenance, we handle the complete scope.

We work in residential, commercial, industrial, hospital, pharmaceutical, and hotel projects where proper HVAC work is critical.

Our team includes experienced engineers and certified technicians. We follow correct engineering calculations, safety standards, and proven methods. No shortcuts.

We focus on energy-efficient, reliable systems that perform well for years.

Clients trust us for honest work, clean execution, and dependable after-sales service.

Comfort starts with good engineering.

MISSION

Our mission is to deliver reliable, energy-efficient HVAC solutions through accurate engineering, quality execution, and honest practice, ensuring safety, long-term performance, transparent communication, and dependable service support for clients nationwide.

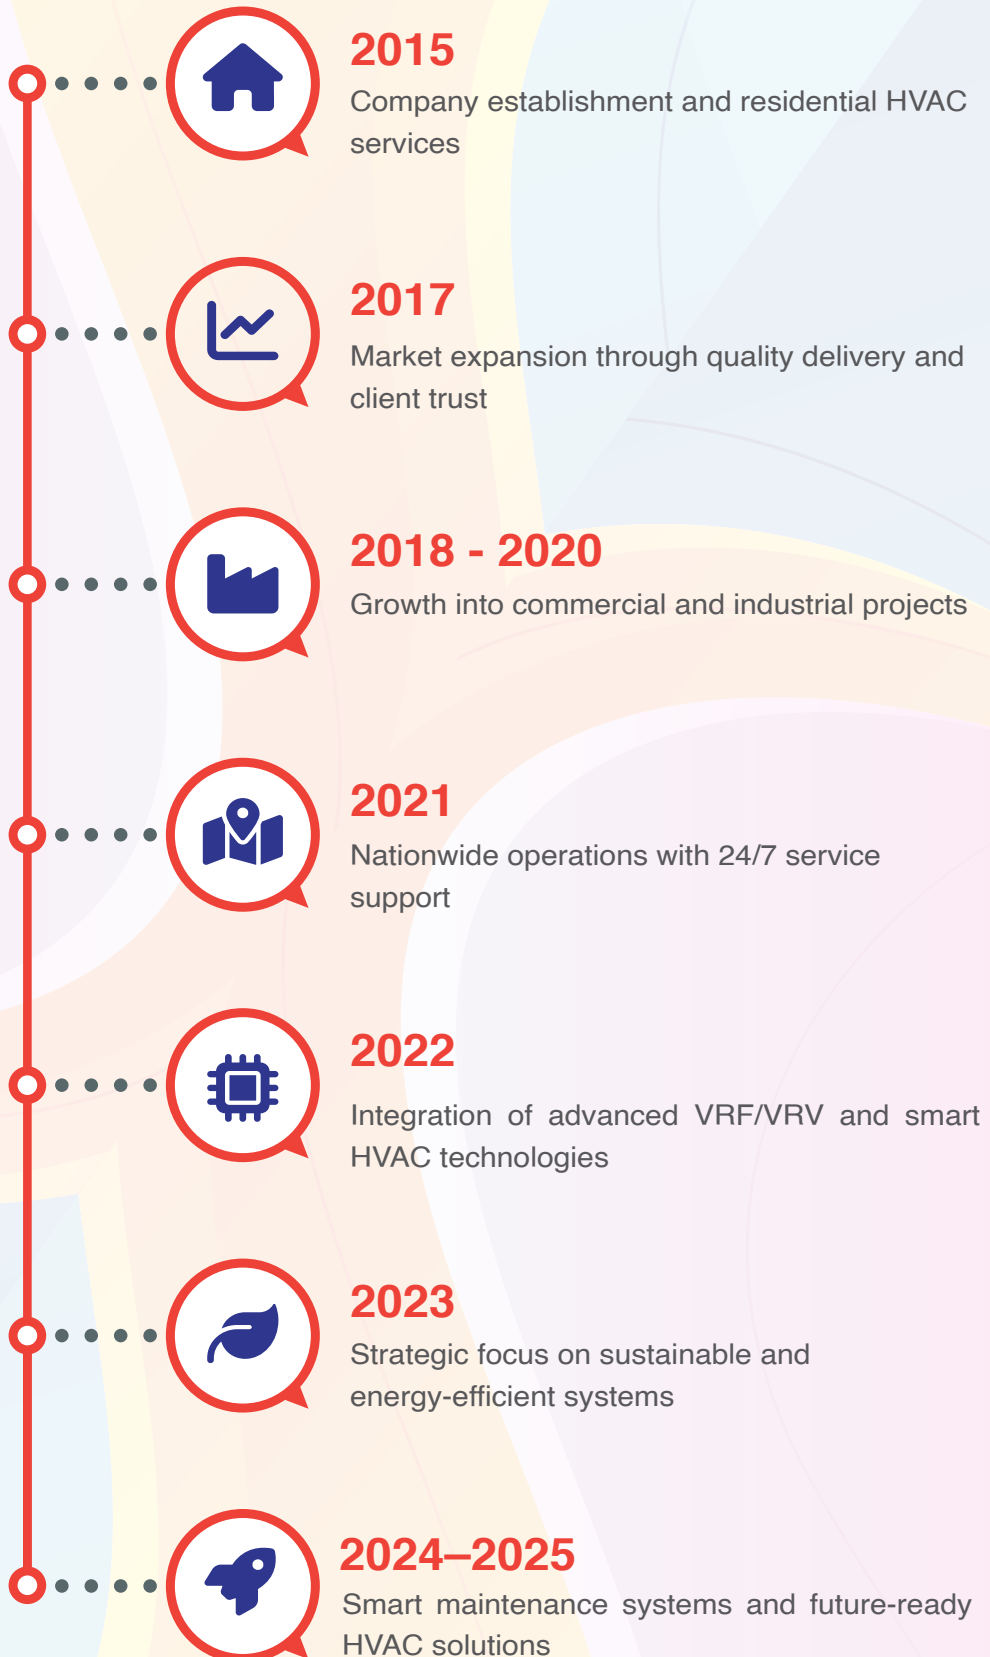

VISION

Our vision is to become a trusted HVAC engineering company in Bangladesh, delivering reliable, energy-efficient climate solutions that create comfortable, healthy indoor environments for modern buildings nationwide across all major sectors sustainably responsibly.

OUR COMMITMENT

We are committed to delivering high-quality HVAC solutions through accurate engineering, safe installation, and honest service. We focus on reliability, energy efficiency, timely delivery, and long-term system performance, supported by clear communication, skilled teams, strict safety standards, and dependable after-sales maintenance across all projects, nationwide operations, client-focused execution, continuous improvement.

OUR JOURNEY

MESSAGE FROM FOUNDER & CEO

Founder & CEO

Mountain Engineering was established to provide reliable and professional HVAC engineering solutions based on correct design, quality execution, and compliance with industry standards. From the beginning, our objective has been to deliver systems that are efficient, safe, and dependable.

We focus on engineering accuracy, disciplined project execution, and long-term system performance. Our experienced engineers, technicians, and management team work within structured processes to ensure consistency, quality control, and timely project delivery.

We continue to invest in skilled manpower, modern tools, and updated technologies to meet evolving client requirements. Our approach emphasizes energy efficiency, operational reliability, and sustainable engineering practices across all sectors we serve.

I would like to thank our clients, partners, and team members for their continued trust and cooperation. We remain committed to maintaining quality, transparency, and dependable service as we move forward together.

Best Regards

Kazi Moudud Hossain

MESSAGE FROM MANAGER – OPERATIONS

Manager
Operations

At **Mountain Engineering**, our operations are driven by discipline, coordination, and accountability. We focus on executing every project efficiently while maintaining approved engineering standards, safety requirements, and planned schedules.

Our operations team works closely with engineering, procurement, and site personnel to ensure smooth workflow, proper resource utilization, and timely decision-making. Through structured supervision and clear communication, we minimize risks and maintain consistent quality across all project stages.

We emphasize continuous improvement, site safety, and operational reliability to support long-term system performance and client satisfaction. Our goal is to ensure every project is delivered professionally, responsibly, and in line with client expectations.

I sincerely thank our clients, partners, and team members for their continued trust, cooperation, and commitment. Your support enables us to maintain operational excellence and deliver dependable results.

Best Regards
Kumar Tan Sen

MESSAGE FROM MANAGER – ADMINISTRATION

Manager
Administration

At **Mountain Engineering**, the administration function plays a vital role in supporting smooth operations and effective project execution across all departments. We focus on structured processes, compliance, and clear documentation to ensure organizational efficiency.

Our team manages human resources, procurement coordination, financial administration, and office operations with accuracy, accountability, and consistency. By maintaining organized systems and timely support, we enable technical and operational teams to perform effectively.

We are committed to transparency, internal control, continuous improvement, and professional workplace standards. Through efficient administration and responsive support, we help maintain a productive environment and dependable service delivery.

I sincerely thank our management, colleagues, and partners for their cooperation, dedication, and trust. Together, we remain focused on supporting sustainable growth and long-term organizational success.

Best Regards
Aisha Akter Shima

TECHNICAL TEAM

Our technical team includes engineers, senior and junior technicians, and support staff with practical field experience. They are responsible for installation, servicing, and maintenance of HVAC systems, ensuring work is done correctly, safely, and on time.

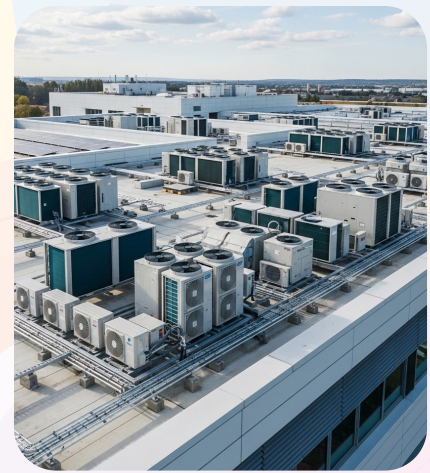

OUR SERVICES

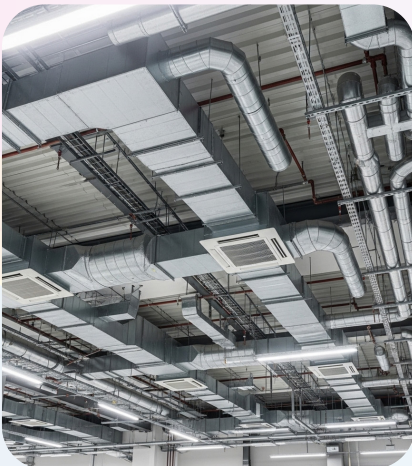

HVAC Design & Engineering

Complete HVAC system design from concept to commissioning. Our engineering team develops energy-efficient, code-compliant solutions tailored to your facility's specific requirements, ensuring peak performance and long-term reliability.

VRF/VRV Solutions

Advanced Variable Refrigerant Flow/Volume systems for maximum efficiency and zoned comfort control. We deliver precise temperature control with reduced energy consumption, ideal for multi-zone buildings requiring individual climate management.

Commercial & Industrial Air-Conditioning

Comprehensive solutions for offices, retail spaces, manufacturing facilities, and industrial plants. We install split systems, cassettes, ducted units, packaged systems, and precision air-conditioning meeting international standards.

Chiller & Central Cooling Plants

Complete chiller plant design, installation, and integration services. Air-cooled and water-cooled systems engineered for optimal efficiency, capacity management, and automated operation with minimal downtime.

OUR SERVICES

Ducting & Mechanical Works

Professional HVAC duct fabrication, installation, and insulation services. Complete ductwork systems with proper airflow, minimal leakage, and code-compliant installations delivered by skilled tradesmen.

Ventilation & Fresh Air Systems

Indoor air quality solutions with controlled fresh air intake, exhaust systems, and air filtration. Proper air changes, humidity management, and HEPA filtration for commercial kitchens, laboratories, and clean rooms.

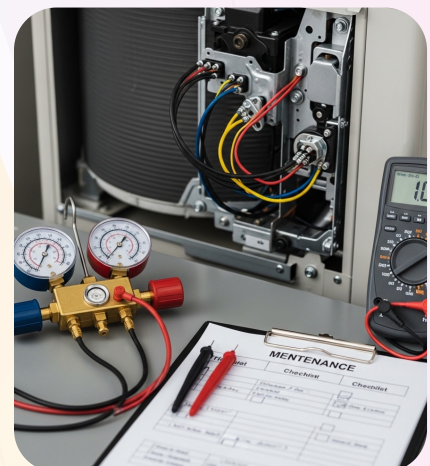

Refrigeration & Cold Rooms

Commercial refrigeration systems, walk-in cold rooms, freezers, and temperature-controlled storage solutions. Turnkey installations ideal for food processing, pharmaceuticals, hotels, and cold storage facilities.

O&M and AMC Services

Comprehensive Operation & Maintenance and Annual Maintenance Contract services with 24/7 emergency support. Preventive maintenance programs minimize downtime and extend equipment lifespan through proactive care.

OUR SELLING PRODUCTS

DOMESTIC AC

BRANDS WE SELL

VRV/VRV

CHILLER

SPLIT UNIT

COMPRESSOR

Discover our selection of top-tier compressors, featuring cutting-edge technology and efficient designs that ensure peak performance for your HVAC systems.

SPARE PARTS

SERVICE HIGHLIGHTS

-  End-to-End Solutions
-  Certified Technicians
-  Quality Materials
-  Safety Compliance
-  Timely Execution
-  Transparent Pricing
-  Warranty Support
-  24/7 Availability

WORKING PROCESS

Our work process is structured to ensure engineering accuracy, quality execution, and timely delivery. Each project follows a systematic approach from assessment to commissioning, ensuring safety, compliance, and long-term system performance.

Requirement Assessment

We review client requirements, site conditions, and project objectives through detailed technical evaluation.

Engineering Design & Planning

Our engineers prepare accurate designs, system selection, calculations, and execution plans following standards.

Approval & Coordination

Designs and schedules are finalized through client approval and coordination with project stakeholders.

Installation & Execution

Skilled technicians install systems using approved materials, safety procedures, and proper supervision.

Testing & Commissioning

Systems are tested and commissioned to ensure performance, safety, efficiency, and compliance.

WHY CHOOSE US

We deliver HVAC solutions through proper engineering, disciplined execution, and dependable service, ensuring long-term performance, safety, and client satisfaction.

Experienced Engineering Team

Skilled engineers and certified technicians ensuring accurate design, safe installation, and reliable system performance.

Standard-Compliant Execution

Projects executed in line with international standards, safety regulations, and approved quality procedures.

Energy-Efficient Solutions

Optimized system designs that reduce energy use, operating costs, and environmental impact.

On-Time Project Delivery

Structured planning and coordination ensure timely and disciplined project completion.

Reliable After-Sales Support

Responsive maintenance services and long-term technical support across all project locations.
